

Lesson 2.1.1

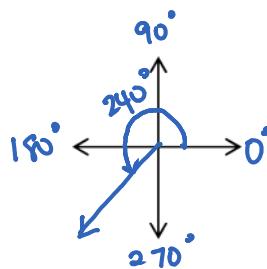

Saturday, February 4, 2017 4:34 PM

2.1 Angles in Standard Position

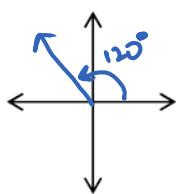

Example 1: Draw each angle in standard position:

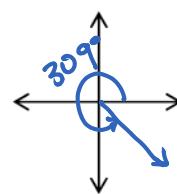

a. 240°

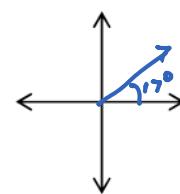

b. 120°

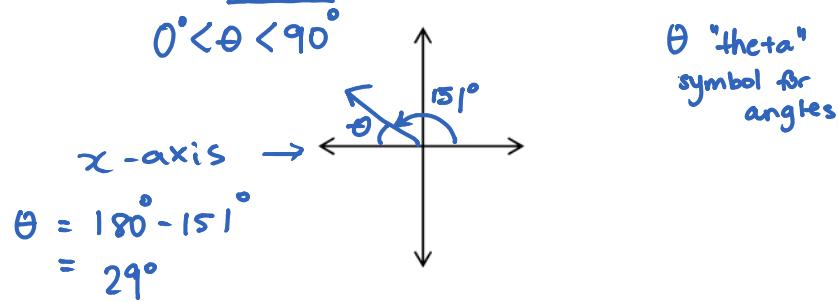

c. 309°

d. 17°

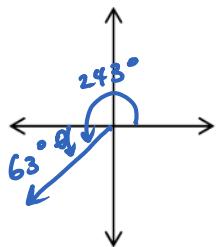

The **reference angle** is the acute angle formed between the terminal arm and the x-axis.

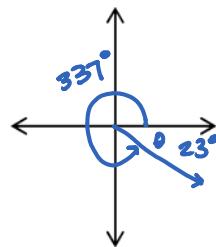

Reference angle is 29° .

Example 2: Draw each angle in standard position and state its reference angle:

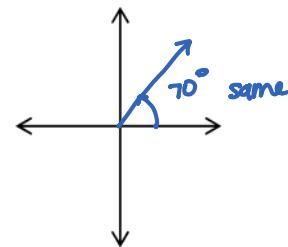

a. 243°

b. 337°

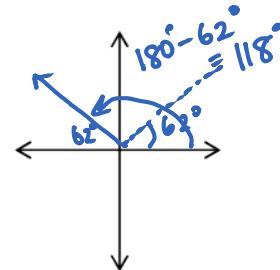

c. 70°

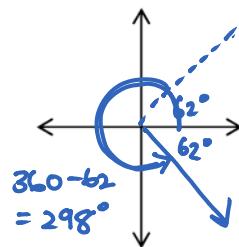

Example 3: Determine the angle in standard position when an angle of 62° is reflected:

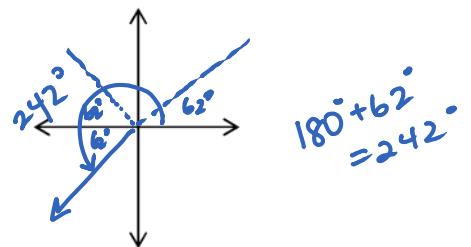

a. in the y -axis

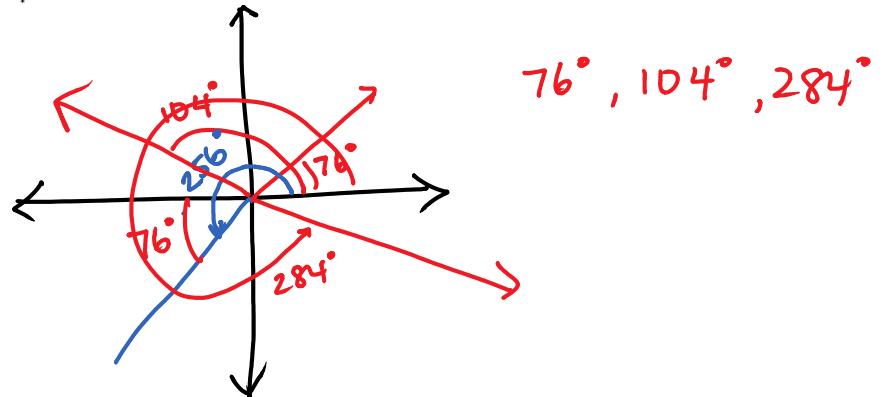

b. in the x -axis

c. in the y -axis and then in the x -axis.

Example 4: Determine three angles between 0° and 360° which have the same reference angle as 256° .

Assignment: pg. 83 #1-7, 9, 10
